

## SUMMARY

Seeking a challenging role in a growth-focused organization to apply my programming skills and freelancing experience while building impactful solutions and growing professionally.

## SKILLS

### Programming Languages:

- Java
- JavaScript / TypeScript

### Frontend Technologies:

- React.js / Next.js
- Redux / Zustand
- Tank Stack Query
- CSS / Tailwind CSS
- Framer Motion / GSAP

### Backend Technologies:

- Node.js / Express.js
- Rest API
- Firebase
- Redis
- RabbitMQ

### Database:

- MongoDB
- MySQL

### Other Tools:

- Postman / Thunder Client
- Git / GitHub
- Figma

## CERTIFICATIONS

- HTML and CSS – Meta (Coursera)
- I hold Certificates from LinkedIn in
  - React.js Essential
  - Node.js and Express Training
  - Introduction SQL
  - Introduction NoSQL

## EDUCATION

### Acharya College of Engineering Technology

2021 - 2025

Bachelor's Degree in Computer Science and Engr.  
CGPA - 8.20

### J. M. J. Matric. Hr. Sec. School

2020 - 2021

HSC | Percentage - 84

## INTERNSHIP / FREELANCING

### G-ZofTech — Freelance Full-Stack Developer

Jan 2025 – Feb 2025

- Developed scalable full-stack applications at G-ZofTech using React.js, Vite.js and Tailwind CSS.
- Worked on front-end and back-end development, enhancing user experience and functionality.

### SkillMate — Freelance Full-Stack Developer

April 2024 – May 2024

- Built full-stack apps with React.js, Tailwind CSS, and Firebase, optimizing performance and scalability.
- Improved front-end and back-end workflows to enhance scalability and long-term maintainability.

### Vault of Code — Front-end Developer Intern

Oct 2023 – Nov 2024

- Built responsive UIs with HTML, CSS, and JavaScript for real-world projects.
- Improved UX and accessibility through better design practices.

## PROJECTS

### Low-Code IDE with Sketch-to-Code

- Automated sketch-to-React.js conversion using an AI tool, cutting UI design steps from 10 to 3.
- Streamlined UI development and improved design workflow efficiency.

### Inventory Management System

- Engineered a full-stack IMS website using React.js, Next.js, MongoDB, TypeScript and Rest API.
- Completed our second freelance project, ensuring high performance and scalability.

### Learning Management System

- Developed a full-stack LMS platform using React.js, Next.js, MongoDB, TypeScript, and REST API.
- Focused on performance, intuitive UX, and efficient course management features.
